

Customs and Border Protection (CBP) Border Security Deployment Project (BSDP)

As America's frontline for homeland defense, U.S. Customs and Border Protection (CBP) is responsible for defending the border between the United States and Canada against the unauthorized entry of terrorists and terrorist weapons, illicit drugs, and illegal aliens.

In order to monitor and protect the nation against these unlawful admissions across the U.S. northern border, CBP engaged Sentrillion Corp. to install an intelligent video surveillance and security solution at 129 land Ports of Entry (LPOEs). Sentrillion's physical security system provides each LPOE with increased perimeter and internal security, enhanced situational awareness and personal safety for CBP officers, and a record of all port activities. Additionally, Sentrillion binds the frontline by unifying LPOEs to central command and control centers capable of monitoring port activities from remote locations. Sentrillion used a comprehensive system-of-systems approach that allowed maximum flexibility in the design of solutions for LPOE as each is unique in facility design, operational environment, and physical environmental factors.

Intrusion Detection System (IDS)

Sentrillion uses intelligent video processing (sub-system of the VSS) to detect intrusions at the LPOE. Virtual fences are designed within facilities and grounds and compliment both the facility perimeter physical security system (fences/gates/barriers) and the VSS. Responders are notified through visual and audible alarms when these virtual fences are breached or specific behaviors are identified. Additionally, a full range of intrusion detection sensors for facilities and barriers are available as options to enhance the IDS and help protect high security facilities such as seizure vaults, safes, and other secure storage sites.
